

CASCADIA · DRIFTLINE · ALPENGLOW · WILDROOT

CASCADIA OUTDOOR BRANDS

FOUR BRANDS. ONE LEAN TEAM.

REQUEST FOR PROPOSAL

IT & ERP Modernization

Issued by Cascadia Outdoor Brands, Inc. · Corporate IT Department
August 3, 2026 · CONFIDENTIAL — FOR AUTHORIZED RECIPIENT USE ONLY

1. Executive Summary

Cascadia Outdoor Brands is a house of four outdoor apparel and footwear brands built on a deliberately lean corporate model — a single, small shared-services team supports finance, IT, and operations across all four brands so that more of every dollar goes into product and people on the ground. That model has served Cascadia well for two decades, but it is now under strain.

Each brand has scaled its own e-commerce and demand-planning needs faster than our shared ERP and IT infrastructure — implemented 14 years ago — can support. Our 14-person corporate IT team is fully consumed keeping daily operations running and has no bandwidth to lead a modernization effort on top of that.

We are not looking to solve this by growing headcount. Adding a large permanent IT organization would undermine the lean model that is core to how Cascadia operates. Any proposed solution must be designed around that constraint, not around it.

Cascadia is issuing this RFP to identify a qualified consulting partner to assess our current-state IT and ERP environment, design a target operating model and architecture, and deliver a phased modernization roadmap.

2. About Cascadia Outdoor Brands

Category	Details
Headquarters	Portland, Oregon
Brands	Cascadia (flagship apparel), Driftline (footwear), Alpenglow (technical mountain gear), Wildroot (lifestyle/athleisure)
Employees	~3,200 across all brands
Corporate Shared-Services IT Headcount	14 FTEs supporting IT for all four brands
Annual Revenue	~\$1.4B combined
Core Systems	Single shared ERP instance (2012), brand-specific e-commerce platforms, disconnected demand-planning tools

3. Scope of Work

3.1 Current-State IT & ERP Assessment

- Assess the existing shared ERP instance, integrations, and data flows across all four brands
- Identify where brand-specific needs are outgrowing the shared platform
- Evaluate technical debt, system risk, and total cost of ownership

3.2 Target Operating Model & Architecture Design

- Design a target IT architecture balancing brand-level agility with shared-services efficiency
- Recommend which capabilities stay centralized vs. become brand-specific
- Propose a governance model for prioritizing competing brand demands on a shared team

3.3 Phased Modernization Roadmap & Lean Staffing Model

- 18–24 month phased migration roadmap with milestones and quick wins
- Staffing/governance model that avoids material permanent headcount growth
- Change management approach across four brand teams with different working styles

4. Required Deliverables

Deliverable	Description
D1 — Current-State Assessment & Gap Analysis	System inventory, technical debt findings, prioritized gaps
D2 — Target Operating Model & Architecture Blueprint	Future-state architecture and capability model
D3 — Phased Migration Roadmap	18–24 month roadmap with dependencies and quick wins
D4 — Lean Staffing & Governance Model	Plan avoiding material permanent headcount growth
D5 — Executive/Board Presentation	Leadership-ready summary of findings and investment ask

5. Proposal Requirements

5.1 Executive Summary

Approach overview, credentials, differentiators, timeline and investment.

5.2 Firm Qualifications & Experience

- Multi-brand/holding-company corporate structure experience
- ERP modernization in retail/apparel/consumer goods
- Designing operating models for lean IT organizations

5.3 Proposed Approach & Methodology

- Phase-by-phase methodology for Section 3
- Assessment tools, frameworks, benchmarks
- Stakeholder engagement model across four brand teams

5.4 Team Composition

Proposed team structure, named key personnel, role and time commitment.

5.5 References

Minimum three (3) references from similar engagements in the past 36 months; multi-brand/lean IT or retail/apparel preferred.

5.6 Proposed Timeline

Start date, duration, milestones, deliverable dates.

5.7 Cost Proposal

Fixed-fee or time-and-materials pricing by phase, deliverable, and role.

6. Proposal Evaluation Criteria

Criterion	Weight & Description
Relevant Experience & Lean-Model Fit	25% — Multi-brand structure and lean-IT design experience
Technical Approach & Methodology	25% — Rigor and practicality of ERP/architecture methodology
Team Qualifications	20% — Seniority and relevant experience of proposed team
Cost & Value	15% — Competitiveness and transparency of pricing
References & Past Performance	15% — Quality and relevance of references

7. Submission Instructions & Timeline

Milestone	Target Date
-----------	-------------

RFP Issue Date	August 3, 2026
Vendor Q&A Window	August 4–14, 2026
Proposal Due Date	August 24, 2026
Anticipated Award Date	September 14, 2026
Target Engagement Start	October 5, 2026

Proposals must be submitted electronically in PDF format. Maximum length: 60 pages excluding appendices and resumes.

8. Terms & Conditions

- Cascadia reserves the right to cancel this RFP at any time without obligation
- Submission of a proposal does not guarantee award of a contract
- Cascadia is not obligated to select the lowest-cost proposal

Non-negotiable: Any proposed solution must explicitly address how it avoids material permanent growth in Cascadia's corporate IT headcount — proposals relying primarily on Cascadia hiring a large internal team will score lower on Relevant Experience & Lean-Model Fit.
